

YC6TD

Marine Diesel Engine

Basic Technical Parameters

Engine Model		YC6TD
Application		Main Engine
Bore/Stroke	mm	152/180
Displacement	L	19,60
Number of Cylinders		6
Type	El. Controlled Pump, T/C, Water-cooled, Four-stroke	
Compression Ratio	14: 1	
Fuel System	Controlled Pump	
Flywheel housing	SAE1	
Flywheel	SAE14"	
Overall dimensions	mm	2110×1125×1415
Net weight	kg	2200

Standard configuration

Cooling system	Thermostat, belt-driven copper impeller seawater pump, gear-driven centrifugal pump (high/low temperature cooling fresh water pump), seawater-freshwater heat exchanger, oil cooler, fresh water cooled, expansion tank, stainless steel water cap configuration, cupronickel cooling tube heat exchanger.
Lubrication system	Gear-driven oil pump, oil cooler, dual oil filter, oil filler port, dipstick, , oil strainer
Fuel System	Oil-water separator, dual fuel filter, manual fuel transfer pump.
Electrical System	DC24V
Others	Installation guide, maintenance manual, parts catalog, packaging box

Overall dimensions
